CUSTOM-MADE RAMPS

With Excellent Ramps it is not necessary to make changes in the building. Our ramps can be adapted to all types of buildings.

Platforms with several ramps

Instead of just using one single ramp you can build a platform with ramps on either side and a smaller ramp towards the door. Now you can still roll your lawn mower to the other part of the garden.

Ramp with landing for turning

If there is very little room you can build a ramp with a small landing for turning and an angle of 90°.

CUSTOM-MADE RAMPS

Ramps with landings and brims

All Excellent ramps can be fitted with a brim that keeps wheelchairs, walkers and other devices from rolling over the edge.

Corner ramps

Corner ramps have the advantage of being accessible from all sides and of having no edges one might stumble over. Even cars can drive over the corners without any problems.

Slip stop

The Slip Stop on our ramps provides a non-slip surface and is always recommended for outdoor ramps.

Stairs

We have replaced the original 2 doorsteps with 4 steps to facilitate access to the door for people with walking disabilities.

OTHER FOCUS AREAS

Ramps for churches and historic buildings

We adapt our ramps to the surroundings and not the other way round! They are thus particularly suited for listed buildings and other sites where nothing must be changed (e.g. UNESCO World Heritage)

Read more on www.churchramps.com

Stable ramps

The robust construction of the ramps allows them to carry the weight of a lorry.

The raising of balconies and balcony accesses

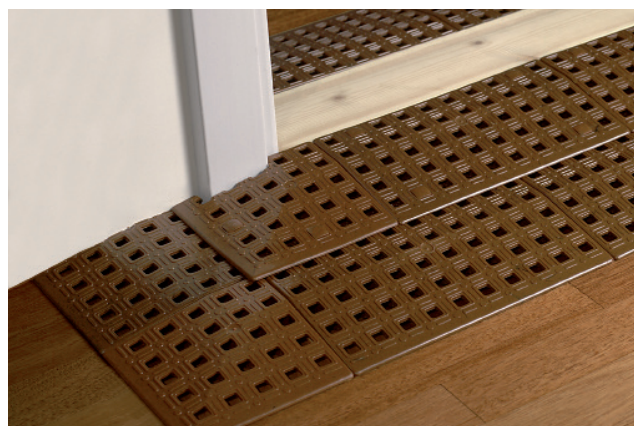

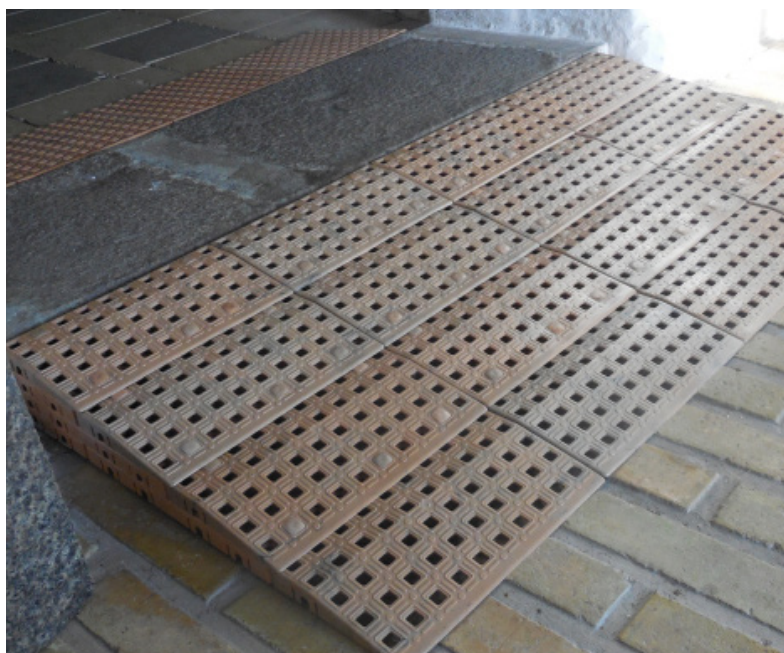

Solutions for all types of balconies and balcony accesses. Combination of raising the floor and installing a ramp.

Read more in our brochure "Raising balconies" or on www-ex-as.com.

COLOURS AND MARKINGS

The basic colour of ramps and tiles is grey.

Natural colours

If you want ramps or tiles that match their surroundings you have the possibility to order natural colours.

Markings

The markings makes the ramp more visible.

INFORMATION ABOUT MATERIALS

The same material is used on the inside of milk cartons.

Materials

All products are manufactured from the environmental friendly material PE (Polyethylene) and are:

- 100% Non-toxic**
- 100% PVC-free**
- 100% Reusable**
- 100% Odourless**

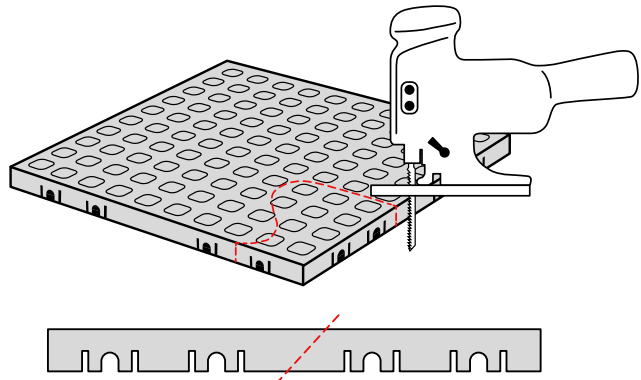

PE- Products are aciduric and non-corrosic.

Fitting

It is very easy to customize Excellent tiles to fit a bathroom floor. The adjustments can be made by, e.g., using an ordinary jigsaw.

They get adjusted to the angles and slopes of the building, so no changes have to be made to the building itself.

“An Excellent ramp has the strength to carry 355 times as many wheelchairs as the ramp has space for.”

Danish Technological Institute

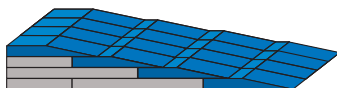

INCLINATION OF THE RAMPS

The flexibility of the Excellent ramping systems, enables multiple inclinations to fit individual needs and building situations.

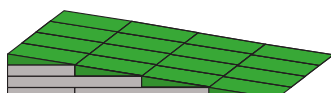

Be aware of national and regional, domestic and public building regulations.

Inclination angle 1:7 (14,5%)

Industrial Ramps

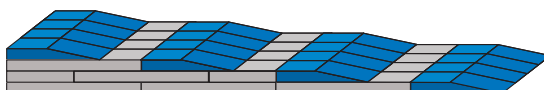

Ramp Type I

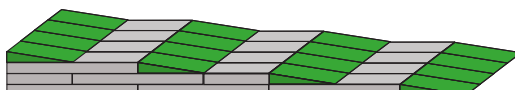

Inclination angle 1:14 (7,5%)

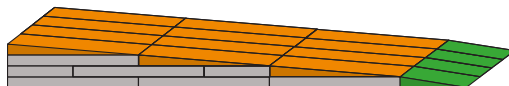

Industrial Ramps

Ramp Type I

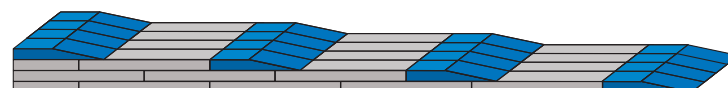

Ramp Type II + I

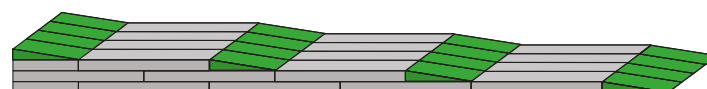

Inclination angle 1:20 (5%)

Industrial Ramps

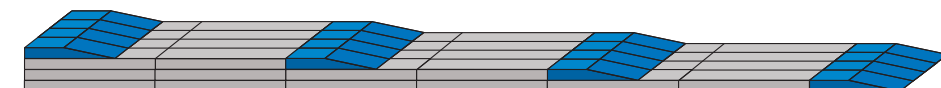

Rampe Type I

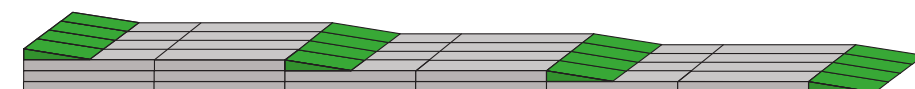

Inclination angle 1:25 (4%)

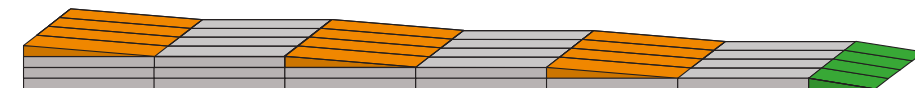

Industrial Ramps

Ramp Type I

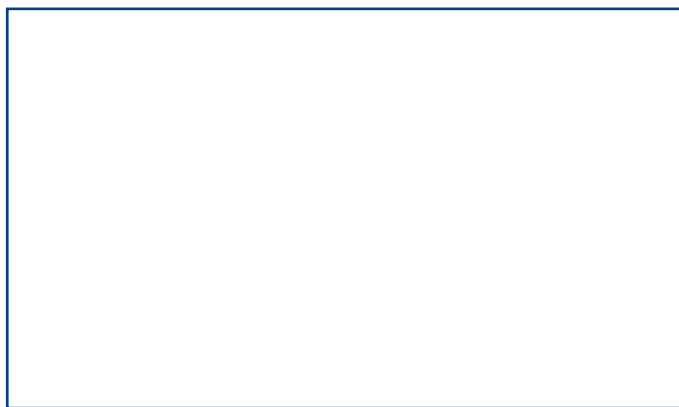

Ramp Type II + I
